

Site Tanks

Liquid Storage Bladder Tanks

One Clarion SITE TANKS, commonly referred to as Pillow Tanks, stand out as an innovative solution for liquid storage needs. Made from robust materials such as PVC or rubber-coated fabrics, these tanks are engineered for resilience and adaptability, capable of enduring various environmental conditions with ease. Their collapsible design is a defining feature, offering notable advantages over conventional rigid tanks. This collapsibility not only facilitates transportation but also simplifies installation, making them a practical choice for diverse applications.

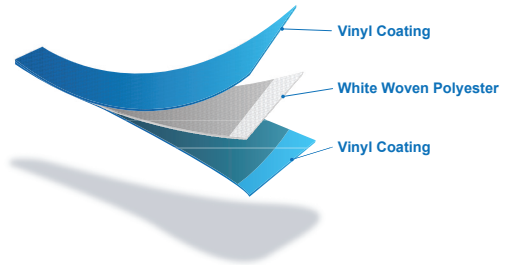

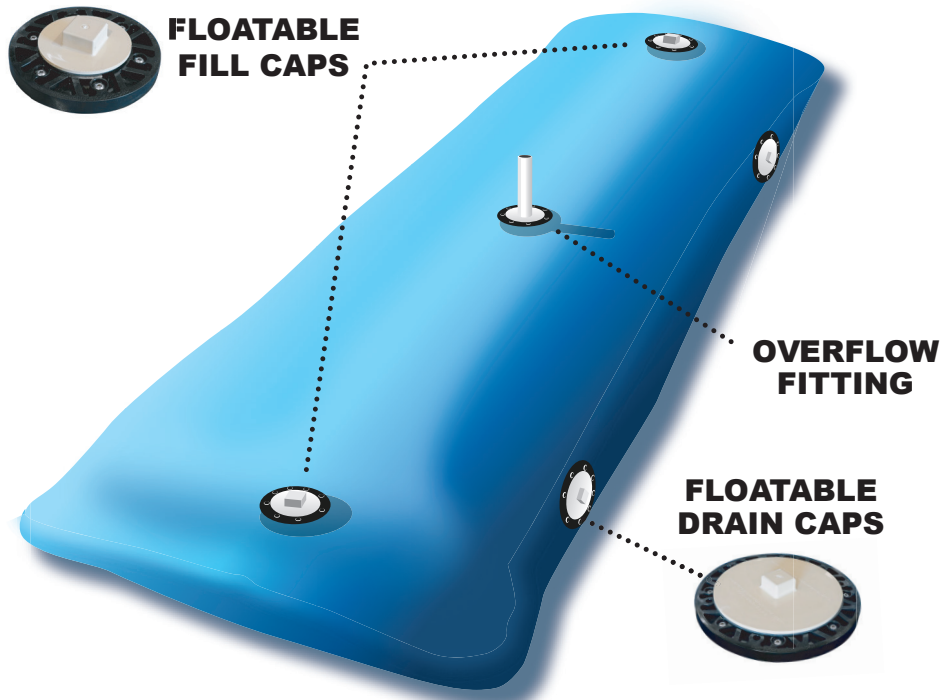

Features

- **Versatility:** Easily foldable and transportable, ideal for remote areas.
- **Durability:** Resists punctures, UV rays, and environmental strains.
- **Potable Water Solution:** Perfect for remote areas, emergencies, or military bases.
- **Fracking Support:** Provides robust storage for water or fracking fluids.
- **Chemical Compatibility:** Safely stores fuels, oils, and chemicals, serving industrial and agricultural needs.
